*many available by glass but please note that we are working with daily winelist.

What are natural wines? Why do we offer them?

We believe that you are what you eat and drink. sounds deep, yes. Industrial wines don't fit our philosophy so we cannot offer them whole heartedly.

Our selection comes from friends, winemakers that we trust.

The wines available on our list are made with sustainable dry-farming, minimal filtration, minimal sulphur and little manipulation.

Nothing nonsense added and nothing is taken away from the grapes.

We want to provide you with a different and fresh wine experience.
